September 21, 2020

To: Parents, Legal Guardians, Students, Building Occupants, Staff, Faculty, Employees, and Workers:

The Environmental Protection Agency's Asbestos Containing Materials in Schools, Final Rule and Notice, 40 CFR Part 763 requires that all BIA school buildings be inspected and re-inspected for the presence of asbestos every three years after a management plan is in effect. This same statute also requires initial and annual notification of the availability of an Asbestos Management Plan that outlines the steps to be taken to eliminate the hazard. We are very willing to comply with this statute because of our great concern for the wellbeing of our students, faculty, and staff.

We have an Asbestos Management Plan available for review in the front office, which identifies all locations of asbestos containing building materials in each building and includes a 3-year re-inspection report and Operations and Maintenance Plan to manage this asbestos. The Asbestos Management Plan is available for review during normal hours of school operations at the Administration Office.

If you have any questions about the Asbestos Management Plan, please contact the Administration Office.

Sincerely,

A handwritten signature in black ink, appearing to be "J. M.", is written above the word "Principal".

Principal
